WILDES HANADA

Cloud Operations Engineer | wildes.hn@gmail.com | linkedin.com/in/hwildes | +5562981240423

PROFESSIONAL SUMMARY

Bilingual Cloud Operations Engineer with 15+ years of experience designing, operating, and scaling distributed infrastructure across cloud, virtualization, storage, networking, and observability platforms.

Strong expertise in Kubernetes, Linux, Proxmox, Ceph, automation, CI/CD, observability, and platform reliability. Proven experience supporting environments with 1,000+ horizontal containers, 500+ distributed databases, and platforms processing over 1 million API requests per minute.

Currently supporting cloud infrastructure operations across a globally distributed platform spanning 50+ data centers in 20 countries.

CORE TECHNOLOGIES

Infrastructure & Datacenter Operations

- Bare Metal Servers (Dell PowerEdge, iDRAC, HPE)
- Rack & Stack / Hardware Installation
- Server Provisioning & Hardware Lifecycle
- Firmware / BIOS / RAID / BMC Management
- Dell OpenManage
- PDU / ATS / Power Redundancy
- SFP / GBIC / DAC / AOC / Breakout Cabling
- LACP / Bonding / VLAN / Trunking / QinQ
- Remote Hands Coordination
- Hardware Troubleshooting / RMA / RCA

Containers: Kubernetes, Docker, Helm, Kubespray, Longhorn, Traefik

Automation: AWX, Ansible, Jenkins, Shell, Git

Observability: Zabbix, Prometheus, Grafana, OpenSearch, Graylog, ELK, ElastiFlow

Storage & Virtualization: Ceph, Proxmox VE, KVM, VMware ESXi, Hyper-V, XenServer.

Databases: MySQL, PostgreSQL, TimescaleDB

Networking & Security: Nginx, HTTP/TCP/UDP streams, Cloudflare, Imperva, FortiGate, pfSense, DNS, WAF, VPN, OWASP Top Ten.

PROFESSIONAL EXPERIENCE

Cloud Operations Engineer | EdgeUno (AS7195)

Jan 2026 – Present

- Support cloud infrastructure and platform operations across a globally distributed environment spanning 50+ data centers in 20 countries.
- Lead datacenter modernization projects involving Proxmox VE, Backup Servers, Ceph Storage, virtualization, storage migrations, and infrastructure lifecycle management.
- Perform cluster upgrades, migrations, capacity planning, and performance optimization across multiple international locations.
- Design and implement automation using Ansible, Shell, and Git-based operational workflows.
- Support DNS analytics, observability, telemetry, and security-focused infrastructure initiatives.
- Collaborate with Datacenter, Network, Security, Customer Success, and Enterprise customers to deliver infrastructure projects and operational improvements.
- Develop monitoring and operational tooling to improve reliability, visibility, and platform efficiency.

DevOps Engineer | Open Data Center (AS262415)

Dec 2024 – Dec 2025

- Led observability modernization initiatives across four data centers and NOC operations in Brazil and the United States.
- Implemented monitoring, logging, and network observability platforms using Zabbix, TimescaleDB, OpenSearch, Graylog, and ElastiFlow.
- Designed and maintained Kubernetes environments using Kubespray, Ansible, Longhorn, Flannel, and KubeVIP.
- Managed 14 Kubernetes clusters supporting internal workloads and customer environments.
- Supported more than 200 containerized deployments.
- Improved application response times by over 80% through database optimization and caching strategies.
- Migrated more than 30 authoritative and recursive DNS zones to Cloudflare.
- Developed automation and CI/CD solutions using Ansible, REST APIs, and GitHub Actions.

DevOps Engineer | Technical Lead | OpenK Tecnologia

Aug 2021 – Nov 2024

- Served as Technical Lead for Infrastructure, DevOps, and Platform Operations teams.
- Managed CI/CD environments performing approximately 100 deployments per day.
- Operated distributed infrastructure across OCI, AWS, GCP, Hetzner, and Equinix.
- Managed more than 1,000 horizontal containers and over 400 Nginx and Traefik hosts.
- Administered more than 500 MySQL databases.

- Maintained platform reliability supporting over 1 million API requests per minute.
- Implemented observability platforms using Zabbix, Prometheus, and Grafana.
- Managed large-scale marketplace integrations and messaging infrastructure using RabbitMQ.
- Performed cloud procurement, vendor management, and FinOps activities.

System Network Administrator | Grupo Lírios

Aug 2015 – Jul 2021

- Managed infrastructure supporting headquarters, warehouses, and 12 branch locations across four Brazilian states.
- Led datacenter, virtualization, networking, VoIP, and Active Directory initiatives.
- Implemented Fibre Channel SAN, HA firewall clusters, monitoring, and disaster recovery solutions.
- Managed Hyper-V and XenServer environments.
- Coordinated infrastructure procurement, vendor management, and facilities operations.

System Network Administrator | CDA Alimentos

Mar 2014 – Jul 2015

- Managed enterprise infrastructure, virtualization, Active Directory, Microsoft 365, backup, monitoring, and network security across headquarters and branch offices.

Information Technology Support Assistant | Midway Labs

May 2013 – Nov 2013

- Provided infrastructure, Linux, Windows Server, networking, and systems administration support.
